

Simple, portable durable mounting bracket for laser projectors and lighting fixtures.

## FEATURES

- **Simple setup, no truss required**  
Our Mobile Mount system allows you to rig one or two laser fixtures effortlessly, without having to worry about lugging truss along with your gear.
- **Durable, made for the road**  
The Mobile Mount is made from rugged aircraft-grade aluminum, so it can handle heavy use from gig to gig or full-on touring.
- **Holds up to two X-Laser fixtures**  
With a 60lb capacity, the Mobile Mount can hold either one large X-Laser fixture (Skywriter, Defiant, Aurora Quad) or up to two smaller fixtures (Caliente, Mobile Beat).
- **Mounts on any standard tripod**  
Easily use the included hardware to attach the Mobile Mount to any 40mm/1.5" stand or tripod. While the tripod is **NOT** included, we recommend the Ultimate Support TS-80.
- **Add a professional look to your laser setup**  
With bold yet simple X-Laser branding on the side of the Mobile Mount, your audience will know that you're using the best laser equipment out there.
